Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Bigolin.

The shell is item 2, the first elastic layer is item 9, the first covering layer is the non-transparent part of cover 4 and the plastic film 5, the second covering layer is transparent zone 7.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bigolin as applied to claim 1 above, and further in view of Nakahara.

Bigolin teaches a bicycle saddle substantially as claimed except for the placement of the second elastic layer. The patent to Nakahara teaches a bicycle saddle including a second elastic layer (see Figs. 1A and 1B) wherein the second elastic layer comprises two rear mounds 16 and a front mound 18 wherein the mounds are joined and connected by surface 68.

It would have been obvious to one of ordinary skill in the art to modify the Bigolin device such that the placement of the second elastic layer was arranged to have two rear mounds and a front mound as taught to be old by Nakahara thereby providing the obvious advantage of placing the cushioning at points of high pressure to provide increased comfort to the rider.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jacobs, Hanson, Ganske et al, Harrison and Yates all teach devices similar to that of the instant invention.
